Chad Koslovsky

AI workflow engineering | Context, controls and operational ownership

Milliken, Colorado · chad@koslovsky.xyz

Senior Engineer - AI-Driven Workflows | RADICL

01 PROFILE

Product and systems engineer connecting AI-assisted workflows with authenticated services, structured data and production operations. Client delivery spans private research tools and tenant-aware support software, informed by NOC leadership, incident escalation and audit ownership.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | 2015-Present

Build client products and tenant-aware services with authenticated APIs, MCP connectors and access policy. Connect support and business context while owning deployment and direct client IT support.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated a long-term client application joining marketplace data, pricing rules, accounts and billing. Owned technical operations and customer support across the complete workflow.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Ran the NOC and production escalations during a multiyear engineering tenure. Modernized workloads into containers, upgraded infrastructure and ran SOC 1/SOC 2 audits with clear operating procedures.

Systems / Software Engineer · Office Evolution | 2014-2015

Built SQL/MongoDB applications connecting CRM, onboarding, provisioning and service operations across locations. Worked with the CEO and CIO to turn cross-team handoffs into shared workflows.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered and supported managed-service client networks and endpoints, including antivirus services. Built diagnostic tooling and handled on-call incidents with owners and end users.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported shared enterprise infrastructure across application and vendor teams. Automated audit/backup workflows and managed virtualization labs, with coordinated incident and change ownership.

03 SELECTED WORK

Technomancy | Shared business services · Founder-built platform | In development

Building TypeScript/Next.js/PostgreSQL software joining support, CRM, scheduling and billing through tenant-aware services. Implemented versioned release and recovery-verification tooling.

Velatis | Private context-aware research workflows · Completed client delivery | Completed client work

Delivered a private research product joining identity, notes, sharing, payments and administration with context-aware AI and deterministic chart services. Preserved ownership and privacy boundaries across the workflow.

Kerf and Warp | Compiler-backed application tooling · Independent framework project | In development

Building an agent-oriented TSX framework with its own compiler and Warp UI toolkit. Routing, authentication, data and actionable compiler diagnostics make application boundaries explicit.

04 CAPABILITIES

LLM applications, tool orchestration and structured evaluation · TypeScript, Python and authenticated API/service integrations · PostgreSQL, graph data modeling and indexed retrieval · AWS access controls, tenant boundaries and privacy-aware workflows · NOC escalation, SOC audits, observability and release verification
